DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 9, 12, 14, 15, 27, 28, 31-40 and 45-49, drawn to an apparatus and a method of ink jet printing comprising cold UV curing, classified in class 347, subclass 102.
- II. Claims 19-26, 29, 30 and 41-44, drawn to an apparatus and a method of ink jet printing comprising UV curing, classified in class 347, subclass 102.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions such as different mode of operation because one using heat UV, one using cold UV.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
